Balkot, Bhaktapur, Nepal

Profile

Motivated and creative UI/UX designer passionate about designing user-friendly digital experience. Skilled in wireframing, prototyping and responsive interface design using figma. Looking for an opportunity to grow as a UI/UX professional and contribute to real world projects.

Education

Kantipur Engineering College, Lalitpur Apr 2020 – Apr 2025

- Bachelor of Computer Engineering

Modern Public Secondary School, Nepalgunj 2018 – 2020

- +2 Science

Brightland School, Nepalgunj 2017

- Secondary Education Examination (SEE)

Experience

- Developed simple and modern mobile app interfaces that are easy for users to understand and navigate.
- Worked on different UI/UX projects like food delivery, travel booking, and animated app designs to improve creativity and design skills.
- Learned how to improve user experience by organizing layouts and creating smooth app flows.
- Focused on making designs clean, attractive, and user-friendly by using proper colors, typography, and spacing.
- Practiced responsive design to make apps look good on both mobile and desktop screens.

Trainings & Certifications

NEC registered Computer Engineer Nov 2025

Officially registered as a computer engineer with the Nepal Engineering Council (Registration Number - 98186)

- **MERN Stack Training** — Broadway Infosys May- Aug 2024

135 hrs | MongoDB, Express, React, Node

Built an e-commerce API (JWT auth, Pagination, Stripe). Deployed on Render; CI with GitHub Actions.

Skills

Skills: Figma, Inkscape, Canva, Gimp, UI Design, UX Research, Wireframing , Prototyping, Interaction Design, Responsive Design, Color Theory, Typography, Layout Design, MongoDB, Git, GitHub, VS Code, Vercel, Docker,

Projects

– Mobile App Travel Design

- * Embarked on a clean and modern travel booking UI in Figma with a focus on user-friendly navigation, responsive layouts and attractive visual hierarchy.
- * Established wireframes, interactive prototypes, and booking flow screens to improve user experience and simplify travel planning processes.
- * Applied UI/UX design principles including typography, color consistency, spacing, and reusable components to deliver an engaging and functional travel application interface.

– Food Ordering App Design

- * Built a burger app interface with a modern and clean design style to make food browsing more enjoyable for users.
- * Added interactive sections like menu categories, burger details, and order options for a smooth mobile app experience.
- * Improved the overall app flow by using consistent colors, readable typography, and simple navigation elements

– Smoothie Selection Mobile App Design

- * Initiated a colorful smoothie app UI design in Figma with a fresh and modern look.
- * Created easy-to-use screens for exploring smoothie flavors, viewing details, and placing orders quickly
- * Used clean typography, vibrant colors, and simple layouts to make the app visually appealing and user-friendly

– 3D Animated Design

- * Planned a creative 3D animated UI concept in Figma with modern visuals and smooth design elements
- * Experimented with animations, gradients, and layered components to create an engaging user interface experience.
- * Focused on improving visual appeal through interactive layouts, clean spacing, and attractive 3D effects.

– Rotated Pizza Selection App Design

- * Designed a modern and visually engaging Pizza Ordering UI in Figma, focusing on intuitive navigation, attractive layouts, and a seamless user experience.
- * Created responsive wireframes, interactive prototypes, and reusable design components to streamline the ordering process and enhance usability across devices
- * Applied core UI/UX principles including typography, color harmony, spacing, and visual hierarchy to deliver a clean, user-centered, and conversion-focused interface.
